Wingmed Timeline

Our Company Timeline

OEM-ODM MANUFACTURING PROCESS

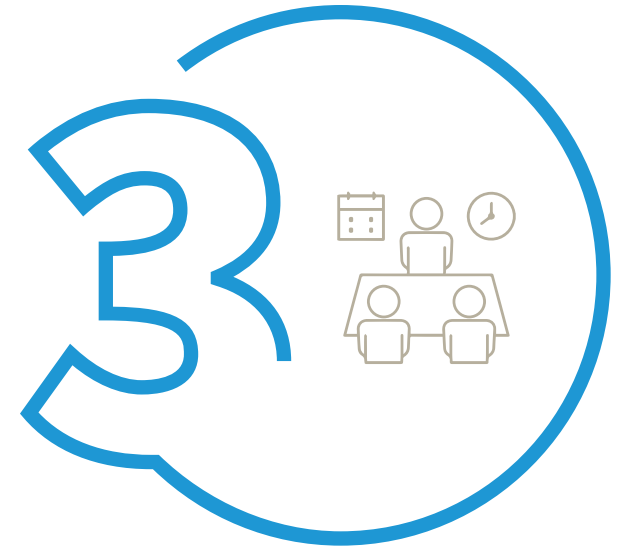

Prototyping & Reverse Engineering

Asking for samples of your products if it's already on market. If it's not launched yet we are prototyping product towards your needs or you may choose from our own product range as a base model for customization

Cost Calculation & Sample Production

Searching for raw materials regarding your sample, our own designs or your needs. Cost calculation specially to your order quantity and preparing final samples regarding your customization

Final Evaluation

Sending final sample as it's like a ready to sell product to you for evaluation. Getting last feedbacks and confirmations to get work done

Customization Capabilities

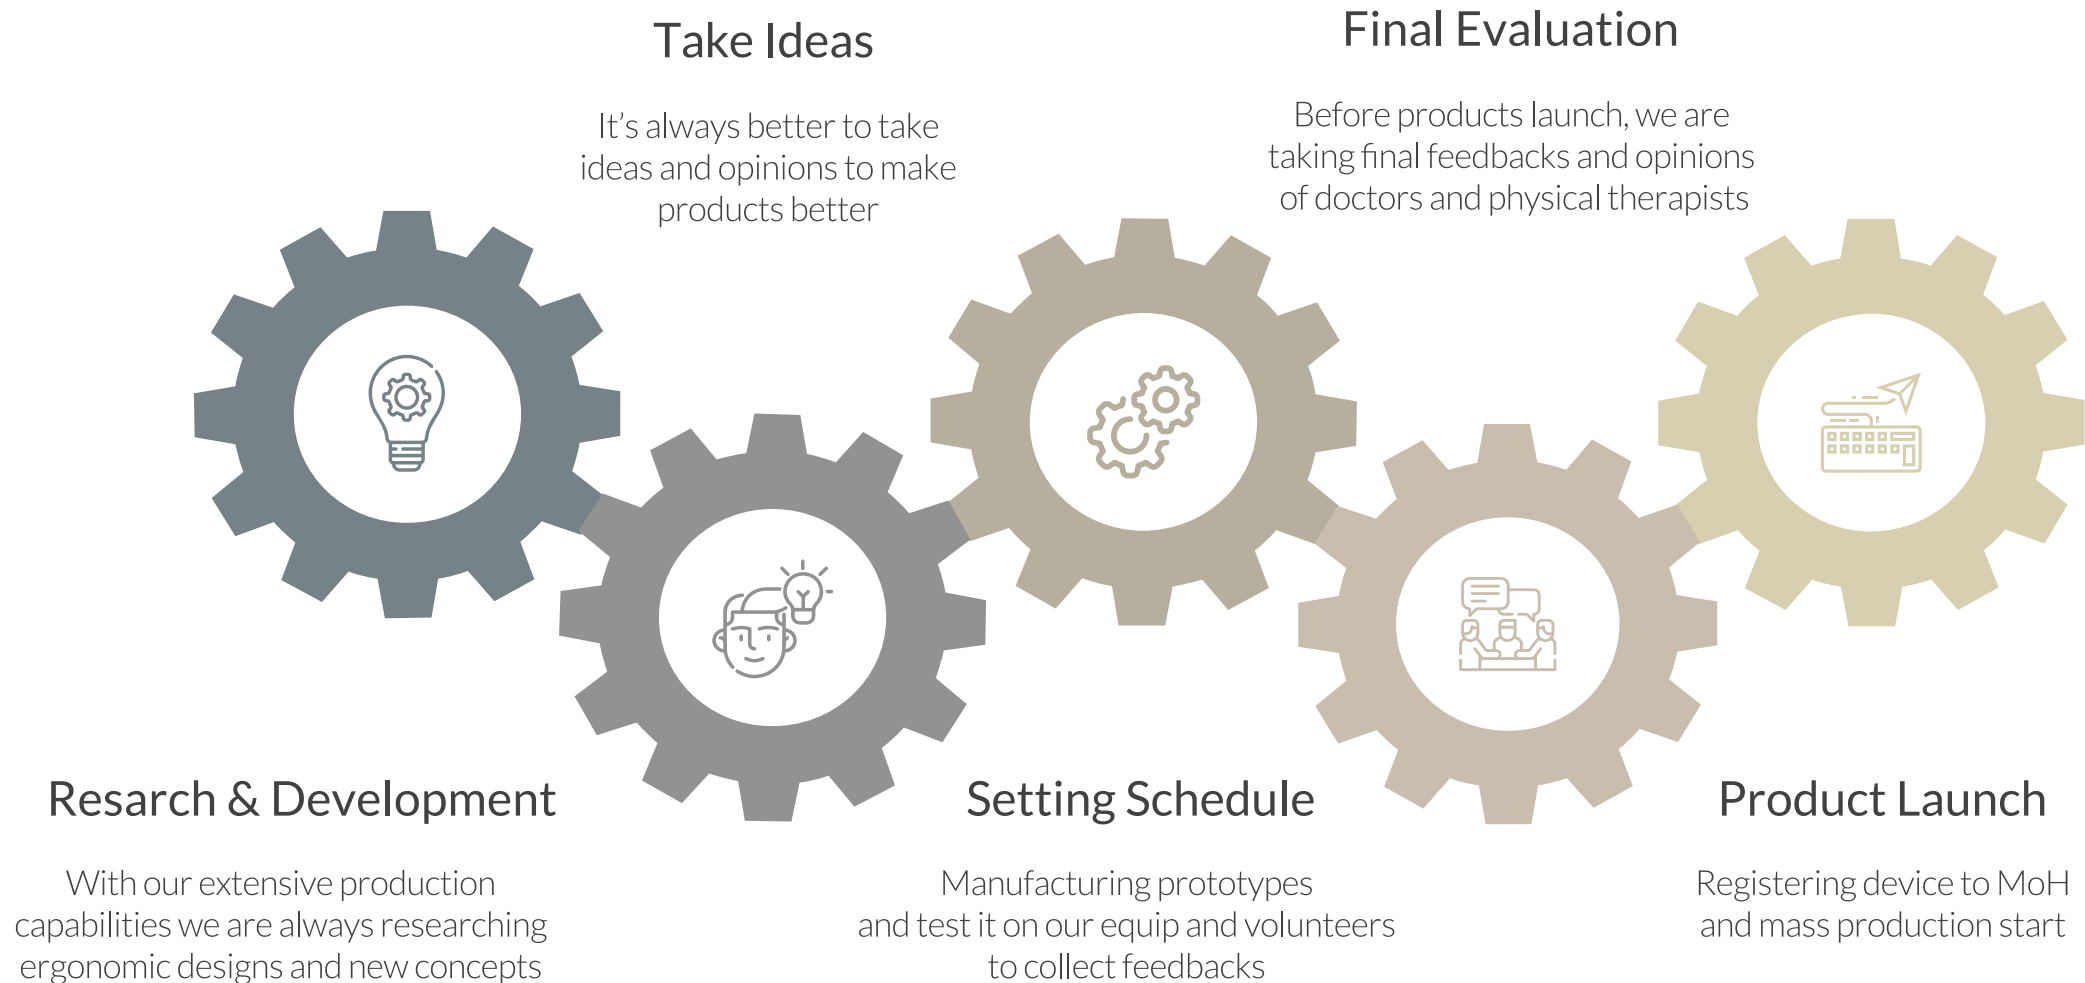

We are in the service of you with our manufacturing experience approach for 25 years and customer-oriented process in the orthopedics products of medical industry. Either you may choose designs from Wingmed's vast product portfolio or proceed with your own design with our prototyping service.
